-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's response filed on 09/14/2005 has been fully considered. The Double Patenting rejection has been withdrawn in view of Applicant's submission of Terminal Disclaimer.
2. Claims 1-28 are pending. (NOTE: Claims 4-22 are still withdrawn from consideration as non-elected invention).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1, 27 and 28 are rejected under 35 U.S.C. 102(a) as being anticipated by Mishima (US 6,183,851 B1).

Mishima discloses an ink jet image recording medium comprises a support and a coating layer provided on the support (abstract). The coating layer comprises a polysaccharide binder (equivalent to the claimed sorbant) (col. 9, line 12), a metal salt (equivalent to the claimed cationic material) (col. 13, line 32), and silicone oil (equivalent to the claimed repellant) (col. 16, line 7). The amount of the polysaccharide resin overlaps with the claimed range (col. 10, line 9). The support can be cloth (col. 17, line 12).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2, 3 and 23-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mishima (US 6,183,851 B1), as applied to claims 1, 27 and 28, above, in further view of Kawasaki et al. (US 6,338,891 B1).

Mishima does not teach the use of fluorocarbon resin in place of the silicone oil.

Kawasaki teaches an ink jet recording sheet comprising a support and an ink receiving layer on the support (abstract). The ink receiving layer comprises repellents such as fluorocarbon resin, silicone resin or alkyl ketene dimmer in an amount of 0.05-10% by weight (col. 6, lines 42-57).

Mishima and Kawasaki are analogous art because they are from the same field of endeavor, that is the ink jet recording art. At the time of the invention, it would have been obvious to a person of ordinary skill in the art to use of fluorocarbon resin instead of the silicone oil since the examiner takes Official Notice of the equivalence of fluorocarbon resin and silicone oil for their use in the ink jet recording art and selection of any of these known equivalents to make the ink receiving layer would be within the level of ordinary skill in the art.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Betelhem Shewareged whose telephone number is 571-272-1529. The examiner can normally be reached on Mon.-Fri. 8:00AM-4:30PM.
